

Pipette rinser

Model EPS TOUCH

Fully electronic pipette washer with automatic detergent dosing, allowing the user to freely determine all parameters of the cleaning process and thus adapt them to the degree of contamination of the pipettes. Both pre-programmed and individual programmes ensure excellent cleaning results even with changing requirements.

ADVANTAGES

- Intuitive operation with touch display
- Free programme creation
- Fully automatic programme sequence
- Adjustable amount of detergent
- Adjustable cleaning temperature
- Programme sequence control
- Error message on the display
- Real-time monitoring of fill levels and temperatures
- Data accessible via external connection
- Validation mode
- Password-protected access areas
- Conductivity sensor (can be ordered separately)
- Automatic refill system for detergent tanks
- Cleaning report accessible for each programme sequence

PROGRAM SEQUENCE

1. Loading of the cleaning container with pipettes by the quiver system
2. Selection of the cleaning program and start of the rinsing process
3. Running the cleaning program (fully automatic)
4. Removal of the clean and dried pipettes from the cleaning container
